About 80s Token & NFTs

80s Token is a parallel metaverse cryptocurrency token built on the Binance Smart Chain, this blockchain is fast as hell.

How To Buy $80s Token

Download MetaMask

MetaMask allows you to set up a Binance Smart Chain (BEP-20) Wallet, you can download MetaMask as either a Web browser extension or Mobile App for free!

Setup your MetaMask Wallet

Setup your account & add the Binance Smart Chain to your network list

Buy $BNB

Use Binance or another exchange to buy $BNB and send it to your MetaMask Wallet Address.

Exchange BNB for $80swap

Head over to PancakeSwap Exchange, connect your MetaMask wallet. Head to the exchange page & input the $80s contract address (listed below) set 14% slippage, and swap your $BNB for $80s!

Contract Address:
0x8153B1AD335F623f04Ebc013Fa380C354cb31Ed6

Tokenomics

80s Token Tokenomics

7% of all new 80s token purchases sent to the existing 80s Token holders.
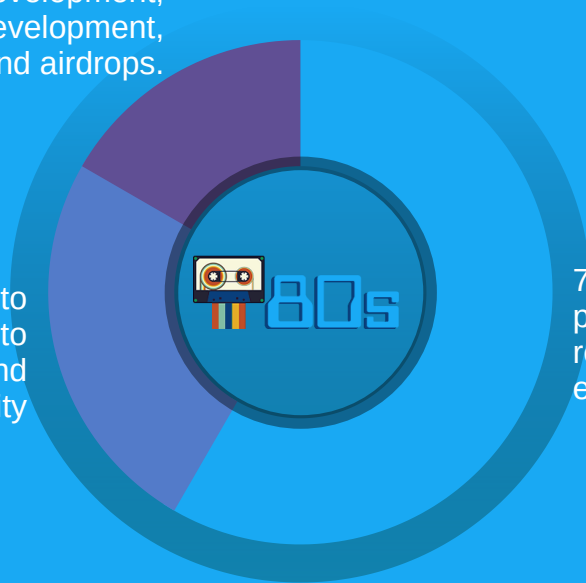

80s Token is a parallel metaverse rewards cryptocurrency token built on the Binance Smart Chain, which is a much faster and less expensive blockchain for users to conduct cryptocurrency transactions on than the Ethereum mainnet.

80s Token is a deflationary token that combines the potential for price appreciation over time with the redistribution rewards to long term holders.

2% is reserved for development, marketing, NFT development, token burns, and airdrops.

3% is sent directly to Pancake Swap to increase liquidity and promote price stability

7% of all new token purchases are redistributed to the existing token holders

80s Token can be periodically burned by the Decades Metaverse development team, and community consensus, to support price stability and appreciation, while the minting new 80s Tokens is not programmatically possible. This prevents future supply inflation.

These functions are hard coded in the token smart contracts on the BSC blockchain, and are immutable.

Initial supply = 1 quadrillion

Contract Address:

NFTs

80s NFTs are various series of NFT series that focus on reinterpretations of 1980s inspired themes and completely new characters that have an 80s retro or future-wave style.

Think of it as an alternate 80s metaverse that is created by you, the Decade Metaverse community.

The first 80s NFT Series is called "80s Rockers" and is a series of new character concepts inspired by famous icons from the 1980s.

The second series is called "The 2180s" and is a futuristic artistic portrayal of what life and characters will be like in the next millennium.

If you have any questions about 80s Token or you have an 80s themed NFT that you want promoted on the 80sToken.com website please send an inquiry through our contact form.

Roadmap

Phase 1

- Secure Angel Funding
- Mint BEP-20 80s Token
- Procure initial NFT art
- Build community blog
- Complete website
- Lock initial liquidity

Phase 2

- Expand NFT artists
- Burn tokens
- NFT contests
- Expand marketing
- Mint new decade themed tokens

Phase 3

- Build Decade Swap DEX
- Increase charitable focus
- Community NFT series
- Unique community rewards system
- Airdrops of new tokens & NFTs
- Release inspired new NFT Collections
